

ANU Flykil

ARE FLYING INSECTS CAUSING PROBLEMS?

ANU FLYKILL

AN INSTANT FLYING INSECTS KILLER

The Battle with Insects:

Flying insects are dangerous to mankind as they cause discomfort at working place, become medium for spreading dangerous diseases, suck human blood and inject deadly germs in the body. Food beverages, sweets and eating items are poisoned and become unfit for human being.

Safe & Economical:

Pesticides and chemicals are sprayed to control them but these methods have very temporary effects and also causes many new problems by polluting the atmosphere. It has been ecologically proved that ultra violet radiations has magnetic attraction to various flying insects like flies, mosquitoes, home flies, moths, etc.

Anu Flykill is based on these discoveries and employs one/two special variety of ultra violet tube lights to attract these flying insects. A high voltage electrically charged guard is placed near by, which kills them instantly. Tray at the bottom is used to collect them. By these arrangements, flying insects do not drop here and there like in case of chemical sprays.

Running cost of Anu flykill is very negligible as no consumables are required except electricity

Different Models For Varying Needs:-

| Model No. | Mounting | Tube | | | Area covered sq.Ft. |
|-----------|--------------|------|------------------|----------------|---------------------|
| | | No. | Length in inches | Watts per Tube | |
| AKC21208 | Table/Corner | 2 | 12 | 8 | 300-500 |
| AKC21815 | Wall/Ceiling | 2 | 18 | 15 | 800-1200 |
| AKC22420 | Wall/Ceiling | 2 | 24 | 20 | 1500-1800 |

Other models with different mounting facility, tube size, length and wattage also available

It Attracts
It Kills
It Collects
All flying insects

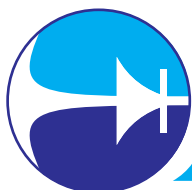

MUSTFOR

- HOTELS
- RESTAURANTS
- CANTEENS
- NURSING HOMES
- PROCESSING UNITS
- SWEET SHOPS
- MEAT SHOPS
- MILK DAIRIES
- FISHERIES
- GARDENS
- FILM STUDIOS

Special Features

- ☐ No Chemical Spray
- ☐ Permanent/Continuous Effect
- ☐ Fully Automatic Operation
- ☐ No Odor
- ☐ Works on Ultra Violet Radiation
- ☐ No Addition to pollution
- ☐ Does not immunise insects
- ☐ Dead insects are collected
- ☐ Most Economical
- ☐ No Smoke
